ARC 5361, Architectural Design 1, 3 credits.

The primary foci of this course are the development of two-and three dimensional graphic skills and the ability to think spatially and to manipulate elements in space.

Course Goals & Objectives:

To learn fundamental design principles.
To develop basic design skills, such as: drawing, sketching, model making, graphics, etc.
To team and use a variety of presentation techniques.
To learn and develop a strict sense of craftsmanship, discipline and work ethic.
To explore analytical techniques for the understanding of the nature of the design problem to be solved.

Student Performance Criterion/a addressed:

Minor Criteria: 2, 3, 5

Topical Outline:

Prerequisites:

None

Textbooks/Learning Resources:

Ching Francis D. K. Architecture: Form, Space & Order
McCreight Tim Design Language

Offered:

Fall only; annually

Faculty assigned:

Valerie Goodwin (F/T)
Beth Lewis (F/T)
LaVerne Wells-Bowie (F/T)
