Trustee Montgomery moved approval of Regulation 1.021 for notice and adoption after the expiration of the thirty (30) day notice period, provided there are no public comments, in accordance with the Florida Board of Governors’ Regulation Development Procedure dated July 21, 2005. It was seconded by Trustee White and the motion carried.

  12  Carry Forward - $767,000.

• For the last informational item, Attorney Shira Thomas provided an overview of the signing authority for contracts.
Chairman Badger called on Trustee Karl White to present the Audit Committee report. Trustee White stated that several information items were presented to the committee:

- First, Trustee White stated that Vice President Givens presented a report on the review of the construction process for the 800-bed residence hall. He stated that the University entered into a design-build agreement with Premier Construction & Development Inc. (Premier) for preconstruction services on December 5, 2011, setting the budget for the project at $34.6 million. The University was delayed in securing funding for construction of the residence hall. Without financing, the University could not enter into a GMP amendment to the contract for the total cost of construction. Because of the delay in funding for the project, the subcontractor bids increased. As a result of the substantial cost increase and inability to come to an acceptable agreement, the Board of Trustees (BOT) voted to terminate the contract with Premier and re-bid the contract. Based on facts presented, Premier should have been aware of the potential cost increases before late June 2012. The report recommends for future design build projects that the University: secure financing prior to preparing a solicitation for a project; follow established design-build procedures or document reasons varying; require the contractor to have experience in building similar types of structures; finalize the GMP prior to obtaining final subcontractor bids; retain an independent architect to review the cost estimates prepared by the design/builder; and require a closer relationship between the project manager and contractor.

- The Audit Committee was informed that the Florida Department of Law Enforcement (FDLE) provided the University with a summary of its investigation on September 12, 2012. The investigation focused on several aspects of the financial operation of FAMU, including activities related to the FAMU Marching Band and the Purchase Card (P-Card) program, as well as past investigations conducted by the Division of Audit and Compliance.

- To provide assurance that corrective actions are implemented to resolve the issues raised, the University has engaged the firm of Ernst & Young to evaluate internal controls over the processes and identify needed improvement. Ernst & Young issued its final report on October 25, 2012. The University has adopted a corrective action plan to address all findings.

Chairman Badger recognized Trustee Alston to present an update on the Trustee-Student Affairs Committee meeting.
