I. Policy Statement and Purpose

The University receives a significant amount of funding from the federal government, specifically in the form of direct support for sponsored projects and reimbursement for indirect costs of federally sponsored grants and contracts. Cost sharing is that portion of the total project costs of a sponsored agreement borne by Florida A & M University (University), rather than by the sponsor. Thus, cost sharing of direct expenditures represents a possible redirection of departmental or school resources from teaching or other departmental and school activities to support sponsored agreements. It is essential that the use of cost sharing does not overburden departmental resources and facilities and administrative recoveries. Therefore, it is a policy of the University to offer cost sharing only to the extent it is required by the sponsoring agency or the sponsored award.

All committed cost sharing and matching/in-kind expenses must conform to the University and federal policies regarding allowability, allocability, and reasonableness and must be verifiable through documentation.
