ODNI to Offer 2nd Annual Summer Seminar for College Students Interested in Intelligence Community (IC) Careers: APPLICATION NOW AVAILABLE/DEADLINE IS MARCH 7, 2010

FAMU Division of Research, Tallahassee, FL— The Office of the Director of National Intelligence (ODNI) will again offer about 40 highly motivated graduate students and college seniors an opportunity to study with currently serving intelligence analysts and other experts. The National Security Analysis & Intelligence Summer Seminar, a reprise of the first such program the ODNI held last summer, is planned for July 11 through July 23 in Washington, DC.

The intensive, residential seminar will include lectures, field trips to agencies and work on substantive topics under the direction of Intelligence Community analysts, academics and other professionals. Career opportunities will be highlighted. Students who are selected and approved will receive secret-level security clearances for the duration of the seminar.

“The program’s benefits are many fold,” said Director Dennis C. Blair. “The Intelligence Community is eager to work with some of the nation’s best and brightest. In return, we hope they will benefit from an inside look at what national intelligence is all about.”

The NSAISS application will be available online in January. It is recommended that students who are interested in careers in intelligence begin to gather transcripts, two letters of recommendation and a current resume that must accompany the application. Applicants will also need to complete Standard Form 86 (SF-86)/Questionnaire for National Security Positions, which is available through the website of the Office of Personnel Management.

The NSAISS is open to U.S. citizens who are graduate students, and to college seniors graduating in the 2009-2010 academic year and applying to graduate school. The seminar is not open to federal government employees, contractors or currently serving military or activated reservists. Participants will receive travel expenses, room and board, course materials and a $500 stipend.

The debut effort attracted more than 700 applicants for 40 slots. The curriculum will be developed, in part, by the seminar’s sponsors – the deputy director of national intelligence for analysis, the IC’s chief human capital officer and the Community’s Centers of Academic Excellence Program.

For more information about the program, eligibility and application visit: http://www.dni.gov/summerseminar or http://www.orau.gov/nsaiss.
