Florida Agricultural and Mechanical University
College of Engineering Sciences, Technology and Agriculture
Tallahassee, Florida

Dr. James Ammons, University President
Dr. Makola Abdullah, Dean and Director, Land-Grant Programs
Dr. Ray Mobley, Director, Cooperative Extension Program
ABOUT THIS EVENT – Farm Fest 2010 is designed to promote the many educational activities and support services offered through the Cooperative Extension Program at Florida A&M University. The event will highlight new and improved technology for crop production, and demonstrate the close relationship between agriculture, the economy and the environment by demonstrating sound environmentally friendly practices and stewardship. Students will be exposed to a wide range of career choices; and many opportunities for advancement in the agricultural industry will be provided for beginning farmers and ranchers, as well as our youth. Farm Fest will also afford local businesses an opportunity to showcase a wide variety of agricultural resources that farmers and home gardeners rely on in everyday life.

Directions: From Quincy: Driving from the Gadsden County Court House square on US 90, take County Road 267 north approximately 6 miles. The FAMU-REC will be on the left. From Tallahassee: Travel west from Tallahassee on U.S. Highway 90 (Tennessee Street) to Quincy, a distance of 22 miles. In Quincy continue on Highway 90 to just beyond the Gadsden County Courthouse and then turn right onto State Highway 267. Travel 6 miles to site, located on the left. Signs will be posted to assist.
