Knowledge of Subject Matter

Artifact: Black History Unit Plan
Dr. Kelley EME 4400 Spring 2010

Reflection

This artifact contains my Black History Unit Plan. I chose this artifact because it shows that I have learned and understand the subject matter and can create a unit plan to teach it effectively to my students. It also shows that I am capable of doing research to become knowledgeable in my subject matter and to integrate subject areas in my classroom. This artifact will help me in the future as a teacher because I will be able to plan integrate unit plans that will encompass a variety of learning objectives and instructional activities. This artifact will benefit my students because their instruction will be tailored to meet their needs, interests, and curiosities.

This artifact relates to the Accomplished Practice Knowledge of Subject Matter in that it communicates knowledge of subject matter in a way that enables students to learn, increases knowledge of subject matter to integrate learning activities, uses materials and technologies of the subject to develop learning activities, and develops short and long term goals for knowledge of subject matter. This artifact relates to the Conceptual Framework Technology in that it uses a variety of technology tools and software to support student learning and uses technology to prepare and teach lessons. It relates to Professionalism in that it constructs learning opportunities that support student development and acquisition of knowledge and motivation.
