Elementary Education Department
Advanced Program
Standard 2 Assessment

Data-driven Changes Over the Past Three Years

The Elementary Education Advanced Program made the following revisions based on the FAMOUS Instructional Program Assessment Plan and informal faculty class assessments of candidates’ knowledge and skills:

- The Course of Study for the Advanced Elementary Education Program has been modified to include two new courses: A technology course, EME 5304 Fundamental Computer Concepts & Skills was added to assist candidates in using of hardware and software-based applications appropriate for the classroom and other school-based activities. The second course, EEC XXXX Applied Child Development will be implemented spring 2010. Faculty assessment determined that candidates need to know and be able to develop instructional plans, apply that are appropriate to developmental learning needs of students.
