58,000 servers, 7,200 applications, 32 million digital users.

Technology is hardwired into everything we do – all thanks to the incredible minds that work for us. They’re changing the shape of biometrics, cloud computing and next generation platforms. Because of them, we can deal with $4 trillion in payments and 125,000,000 shares traded. Daily. Which means our clients can continue to innovate, evolve, and build a future with us.

JP Morgan is proud to partner with FAMU’s College of Science and Technology to host an event where the classroom meets real business solutions. Please join us and your professors to discuss brilliant technologies, and find out how you could become one of them, at our TechTalk event.
