Safety Tips

Slip, Trip, and Fall Statistics

In 2015, slips, trips, and falls accounted for 45 percent of all work related injuries for FAMU employees. Preventing slips, trips, and falls requires a combination of hazard identification and correction, as well as personal responsibility.

Slip, Trip, and Fall Prevention

- Clean up spills immediately
- Post and identify wet areas
- Be attentive to obstacles and changes in walk surfaces
- Maintain proper lighting
- Wear slip resistant footwear
- Cover or remove cables or objects that cross walkways
- Report uneven sidewalks or walk surfaces
- Secure mats and rugs that do not lay flat
- Take your time and adjust your stride to a pace that is suitable for the walking surface and task you are doing

Contact the Department of Environmental Health and Safety at ehs@famu.edu or 599-3442 if you have any questions or concerns.
