Safety Tips

Understand the Hazards

Before starting any job, always make sure you understand the hazards and implement the controls needed to prevent yourself and others from being hurt or injured.

Reduce or Eliminate the Hazards

A job hazard analysis can be used to identify hazards and reduce the risk of accident and injury in the work place. The hazard analysis process involves five steps.

- Define scope of work
- Analyze hazards
- Develop/implement hazard controls
- Perform work within controls
- Feedback and improvement
