Main Components of Assessment Model

**Educational Program Assessment**

“An assessment plan and procedures allows for the ongoing collection and analysis of data used for evaluating the outcome of each program objective. The plan specifies the measurement procedures and methods used to evaluate the outcome of each program objective.”

**Course Learning Objectives Classification**

**Direct Assessment of Student Learning Outcomes**
- Field Performance Evaluation (Foundation and Advanced Objectives)
- Rubrics linked to assignments (Selected Program Objectives in Foundation and Advanced)

**Indirect Assessment of Student Learning**
- End of Semester Survey (Foundation and Advanced Objectives)
- Course Evaluations (For both Foundation and Advanced Objectives)
- Student Exist Survey (Graduating Students Only)
