

# Information Presentation for the FAMU BOT: Division of Research Update

PRESENTED BY

**Charles Weatherford, Ph.D.**

**Associate Vice President for Research**

Florida Agricultural and Mechanical University

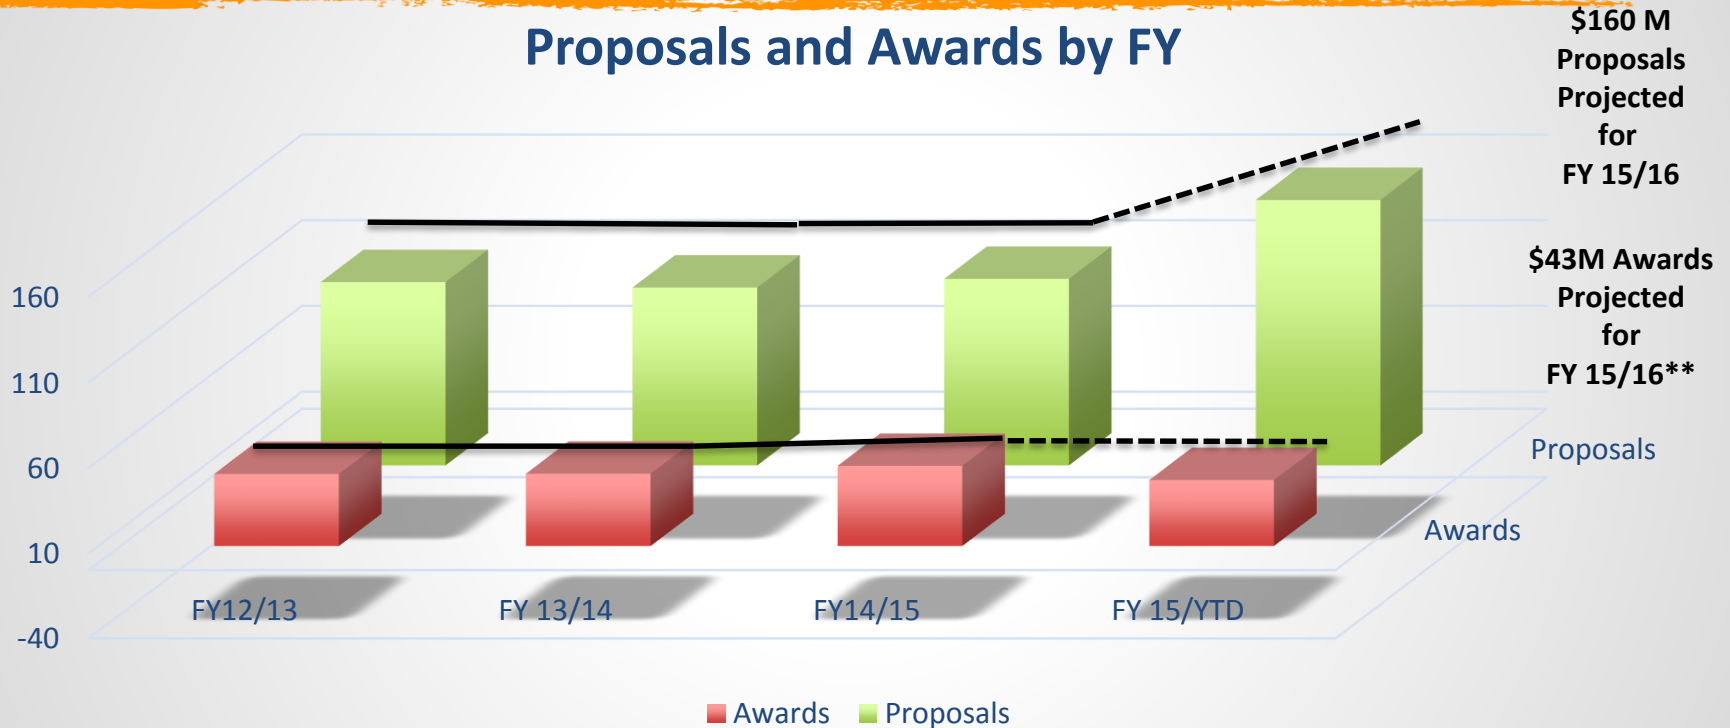

# Purpose

**To provide an update on the state of research and research – related activities at Florida A&M University.**

# Research by the Numbers

## Proposals and Awards by FY

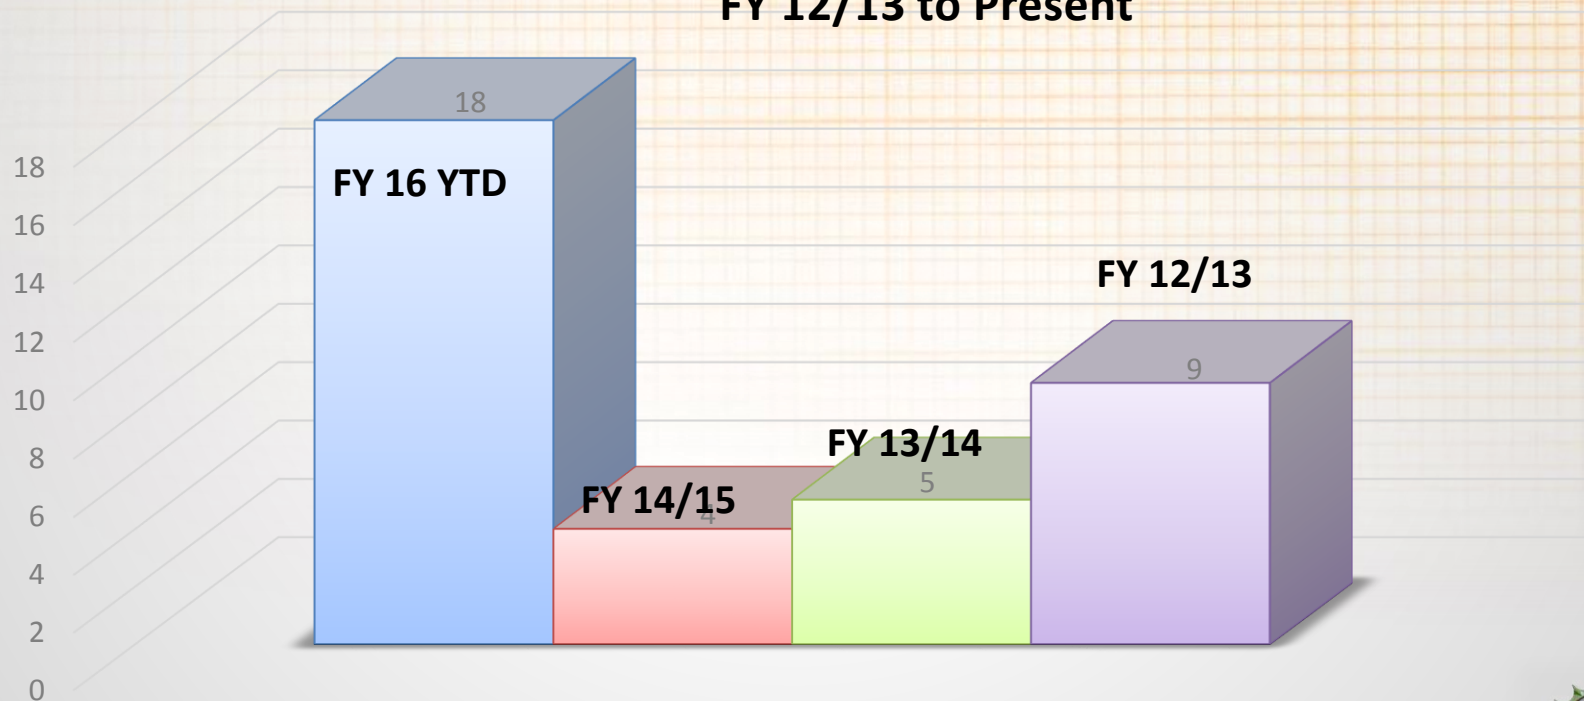

Fiscal Year	Proposals	Awards
FY12/13	\$107.5 M	\$42.4 M
FY13/14	\$103.8 M	\$42.4 M
FY14/15	\$108.9 M	\$47.0 M
<b>FY15 - YTD</b>	<b>\$154.9 M</b>	<b>\$38.7 M</b>

**\*\* FY 15/16 Awards**  
 Due to late federal budget authorization, current awards are trailing last year's totals. FSU, UF, UCF and USF are all reported similar slow federal awards.

# Intellectual Property by the Numbers

## Office of Technology Transfer Invention Disclosures FY 12/13 to Present

Number of Invention Disclosures By Year

- July 2015 to June 2016 (11 Months)
 ■ Aug 24, 2014 to Aug 24, 2015 (One Year Ago)
- Aug 4, 2013 to Aug 24, 2014 (Two Years Ago)
 ■ Aug 24, 2012 to Aug 24, 2013 (Three Years Ago)

# Upcoming BOT Issues for Consideration

1. **Faculty Salary Supplement Plan.** This plan intends to incentivize research and other scholarly activity at FAMU. A draft new policy is currently being vetted with a target of June 2016 presentation to the BOT for review and consideration. This will set an exciting new standard across the SUS.
2. **Quality Research Space.** The BOT is urged to carefully examine the quality, quantity and type of research space available on campus against our requirements in order to fully prosecute our research programs. Of special concern is our life sciences laboratory space, completion of the New Pharmacy Building research space and overall Science and Technology College research space.

# Upcoming BOT Issues for Consideration - Continued

- 4. New Faculty Recruitment and Start-up Packages.** The competition for Scientific Talent is intense. FAMU needs to rapidly consider developing new revenue streams to be applied to targeted recruitment of the “best in class” key faculty in order to expand our research portfolio.
- 5. DRS “Code Education Summer Camp”** is scheduled for mid-summer. This is a partnership between DOMI Station, the DRS and the DOR. This is to expose 6<sup>th</sup> - 9<sup>th</sup> grade students in the basic code writing techniques for mobile devices and to foster an entrepreneurial ecosystem with the DRS.

**Questions?**

“At FAMU, Great Things Are Happening Every Day.”
