Trustee Lawson,

As of this point I am not certain of the role or responsibilities of the President or the institutional staff as it relates to the Chair of the Athletic Oversight Committee. The information shared with the press was not done by the university administration prior to you being informed as a Trustee, but shared by the coach in anticipation of the planned actions. You may recall from your reading of the news articles that I did not confirm that any action had been taken. If you have other questions or information to share about know.

Sincerely,
Elmira

How could this decision not get discussed with the Chair of the Athletic Oversight Committee.

It is not our place to drive personnel decisions, however it is our position to be informed prior these hitting the press.

I would like a detailed explanation as how this disconnect in communication happened???

Kelvin Lawson
