FAMUSecure Configuration Instructions for Mac Computer

FAMU Secure is a new wireless network that operates on the FAMU newly installed 10 GBb network backbone providing increased speed and reliability for network users. FAMU Secure uses WPA2-Enterprise that is considered the gold standard for wireless network security, delivering over-the-air encryption and a high level of security. FAMU Secure also utilizes SecureW2, a Wireless Security Device Management System to helps solve the common pains of deploying and managing our WPA2-Enterprise, making life as easy as possible for your users and our IT staff.
