FAMU Secure is a new wireless network that operates on the FAMU newly installed 10 GBb network backbone providing increased speed and reliability for network users. FAMU Secure uses WPA2-Enterprise that is considered the gold standard for wireless network security, delivering over-the-air encryption and a high level of security. FAMU Secure also utilizes SecureW2, a Wireless Security Device Management System to help solve the common pains of deploying and managing our WPA2-Enterprise, making life as easy as possible for your users and our IT staff.

How to Connect to FAMU Secure Wireless on iPhone Smartphones

1. Go to the Settings applications and Click on “Wi-Fi”
2. Click on “FAMUGuest

3. Click on connect.famu.edu
4. Click “I Accept of the terms of the End-User License Agreement” Next click “Start”

5. Select iPhone and Open Safari Browser
6. Select join “FAMUSecure”

7. Click “OK”
8. Click “Install”

9. Enter your iPhone passcode and click “Install” and “Next”
10. Enter your iRattler “Username” and “Next”

11. Enter your iRattler “Password” and “Next”
12. Click “Done”

Note: The following message will indicate some additional steps may be needed to join FAMUSecure.

After installing the configuration profile, you may still need to join the wireless network. To do so:

1. Go to the main screen of your iPhone.
2. Tap the Settings icon.
3. Tap Wi-Fi.
4. Set the Wi-Fi switch to On
5. Select the FAMUSecure network.

A checkmark will appear next to FAMUSecure when you are successfully connected to the wireless network.

To change wireless networks, your username, your password, you may reset the configuration.

Note: If the profile does not automatically launch, it can be launched manually.
13. Go to the Settings applications, verify if your Configured Profile for FAMUSecure was created.

14. FAMUSecure should be connected. If not Click on “FAMUSecure”.
15. Congratulations you’re now connected to FAMUSecure Network. You can now browse the internet.
